

Food chains Challenge (you might have to do your own research!)
Look at the class clips too)

Explain what an ecosystem is.

In which countries might you find a savannah or tundra?

Research another habitat, describe its features and write an example of a food chain.(you could add clip art/ pictures) Go on to a newpage if you need to.

Make notes from 1 of the class clips that interests you, write about it in your journal and draw a picture. Record a brief summary of what you did here !
